XMPro

Business Process Management

WHAT IS XMPro?

XMPro is a Business Process Management solution that can act as the "glue" between people and the disparate software applications that may operate across your departments and locations. It replaces manual steps with highly visible and enforceable business processes which are tailored to your needs.
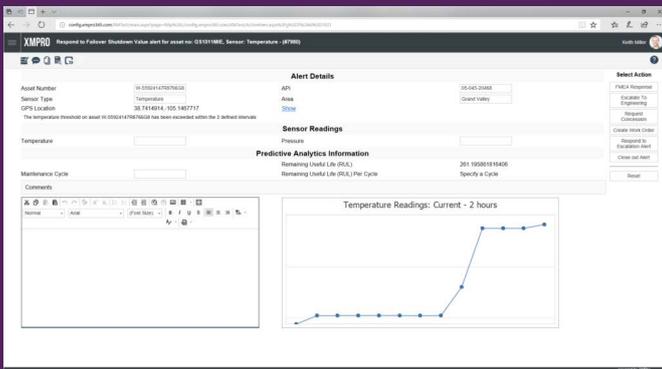

WHY CHOOSE XMPro?

It offers extensive workflow and decision support capabilities that can be bought to bare across a multitude of different use cases. Existing use cases range from supplier onboarding and management, through to IoT integration with smart assets such as sensors for the purpose of predictive maintenance.
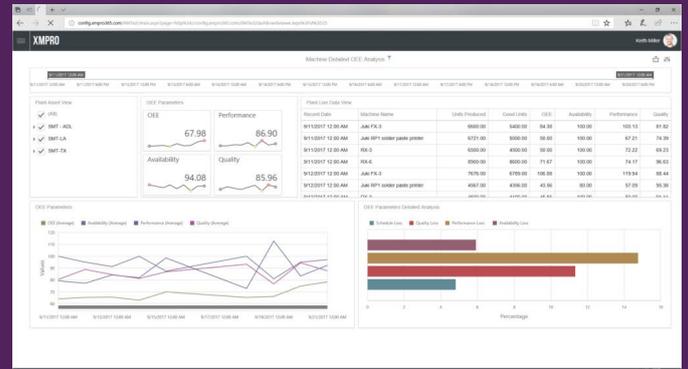

Benefits

- Controls and Compliance - regulatory, risk, audit and visibility

- Reduced Costs - automation, eliminate duplication

- Leveraging your existing IT investments - business alignment, not systems replacement

- Consistency - reliable, best practice outcomes

- Agile - easily meet business and regulatory changes

- Continuous Quality and Service Improvement - competitive advantage

- Analysis - easily drill down

Provide Comprehensive Decision Support

Display machine learning predictions, real time dashboards and detailed asset information in the context of a process. You can also provide built-in guidance on the best action to take next based on custom criteria.
